

How to create a new Liquido (XLQ) wallet?

1. In Account management section select »New account«

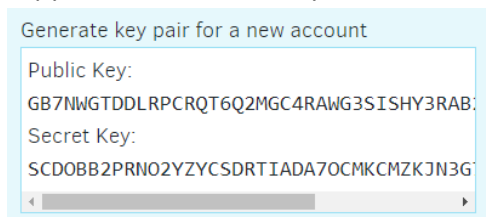

[New account](#) – activate it with 50 XLM.

2. Select »Generate« to generate key pair for a new account

3. Copy Public and Secret key to safe location. Create backup!

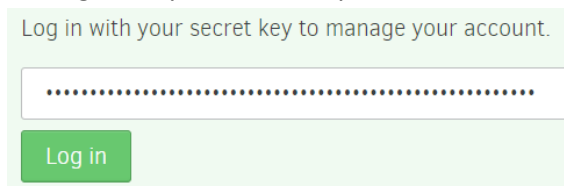

4. From your favorite exchange (Poloniex, Bittrex) load at least 50 Stellar Lumens (XLM or STR) to your new address (public key) to activate it. Buy some more if you want to buy Liquido later!

5. In Account management section select »Add trust«

[Add trust](#) – create trust line for Liquido.

6. For Login use your secret key

7. Find »XLQ – liquido.i-server.org« anchor and select »Create trustline for XLQ«

Congratulation, now you have fully operational Liquido (XLQ) wallet!
